PANAYOTIS A. KOLA

IT Administrator | Systems, Access & Endpoint Management

Athens, Greece · kola.panagiotis@gmail.com · panoskola.github.io
linkedin.com/in/panayotisarturkola · github.com/panoskola/home-lab

PROFILE

IT Administrator with 9+ years in IT support and administration. At Blueground I moved from IT Support Officer to IT Administrator, supporting users in 22 countries and six time zones through Jira Service Management and managing accounts, access and devices across Google Workspace, JumpCloud MDM, SentinelOne and Trend Micro Apex One. At Dialectica I administered Microsoft 365, Google Workspace and NinjaRMM. I run a Windows Server 2022 and Active Directory home lab on Hyper-V and document every build and fix as a runbook. Currently preparing for CompTIA Network+.

CORE SKILLS

Service Desk & Ticketing — Jira Service Management, ticket triage and prioritisation against SLAs, accurate records of incidents and solutions, escalation with full notes, work with other teams on recurring issues

Operating Systems & Software — Windows 10/11, macOS, iOS; Microsoft 365, Google Workspace, Slack, Zoom, Atlassian Jira and Confluence

Device Setup & Management — Setup, configuration and maintenance of laptops, desktops and mobile devices; JumpCloud MDM; desktop imaging and standardisation; asset inventory and lifecycle (Snipe-IT)

Accounts & Access — User onboarding and offboarding, MFA and role-based access, Microsoft 365 Admin Center, Google Workspace Admin

Servers & Networking — Windows Server 2022, AD DS and integrated DNS, Hyper-V (home lab); TCP/IP, DNS, DHCP fundamentals; LAN/WAN and Wi-Fi troubleshooting; 3CX cloud PBX

Endpoint Security — Patch management, SentinelOne, Trend Micro Apex One, Bitdefender, NinjaRMM

EMPLOYMENT HISTORY

Automation Engineer — Velcotech G.P., Athens | Mar 2025 – Feb 2026

Field role outside IT support: electrical automation and control systems for hotel and spa installations.

- Worked on client sites as part of an installation crew, diagnosing and repairing faults on live systems to a fixed schedule, where downtime directly affected the client's guests.
- Documented installed configurations for handover and coordinated daily with the crew, contractors and client staff.

IT Administrator — Dialectica, Piraeus | Jan 2025 – Mar 2025

- Provided on-site and remote end-user support via TeamViewer across Windows and macOS.
- Handled onboarding, offboarding and access roles across Google Workspace and Jira, and administered Microsoft 365, Atlassian, Slack, Zoom and NinjaRMM.
- Tracked IT assets in Snipe-IT and monitored endpoint security alerts in Bitdefender.
- Configured and maintained hardware, software, printers and scanners, and resolved high-priority incidents to restore service quickly.

IT Administrator / IT Support Officer — Blueground, Athens | Nov 2021 – Dec 2024

Information Technology Administrator | Feb 2023 – Dec 2024

- Owned the IT asset lifecycle for office and remote staff — procurement, inventory, provisioning and secure decommissioning — integrated with JumpCloud.
- Standardised desktop images and network configurations and documented Desktop, LAN and WAN standards, which made troubleshooting faster and more consistent.
- Kept endpoints patched and healthy with SentinelOne and Trend Micro Apex One, and followed up on security alerts.
- Suggested and contributed to internal process improvements, and presented them to other teams.

Information Technology Support Officer | Nov 2021 – Feb 2023

- First point of contact for users across 22 countries and six time zones through Jira Service Management: triaged incidents, met SLAs and escalated critical issues with full notes.
- Managed user accounts and access across Google Workspace, Slack and Jira, and devices and policies through JumpCloud MDM.

- Administered and supported the company cloud telephone system (3CX): extensions, user issues and day-to-day changes.

Technical Support Engineer — iSystem Greece, Halandri | Dec 2018 – Nov 2021

- Diagnosed and repaired macOS and iOS devices as an Apple Certified Macintosh and iOS Technician, including component-level hardware work.
- Dealt directly with customers at the service desk: understood the problem, explained the fix and the options, and handled difficult conversations calmly.
- Resolved escalated issues through structured troubleshooting and defined escalation paths, within service SLAs.

IT Store Support — Retail World A.E. (Public), Athens | Jul 2016 – Nov 2018

- Front-line support for laptops, desktops and mobile devices, guiding non-technical customers to a solution.
- Supported point-of-sale and in-store IT systems: device configuration and preventive maintenance to reduce downtime.
- Met monthly KPIs for customer satisfaction and response times.

PROJECTS

Windows Server & Active Directory Home Lab | 2026 – present | github.com/panoskola/home-lab

- Built and maintain a lab on Hyper-V: Windows Server 2022 domain controller with AD DS and integrated DNS, and a domain-joined Windows 11 client on an isolated 192.168.10.0/24 network. Next: DHCP, OU design and Group Policy.
- Run deliberate break/fix exercises — IP and DNS misconfiguration, failed domain joins — and diagnose them with nltest, dcdiag, ipconfig and Event Viewer.
- Document every build and fix as a runbook in Git: what broke, how it was verified and what I learned.

CERTIFICATIONS & TRAINING

- CompTIA Network+ (N10-009) — in preparation
- Apple Certified Macintosh Technician (ACMT) — Apple
- Apple Certified iOS Technician and Apple Professional Support — Apple
- IT Security Foundations: Network Security — LinkedIn Learning

EDUCATION

Vocational Diploma (EQF Level 5), Electrical Automation & Robotics — IEK Delta, Athens | 2014 – 2016

LANGUAGES

Greek — native · English — B2 (professional working proficiency)
